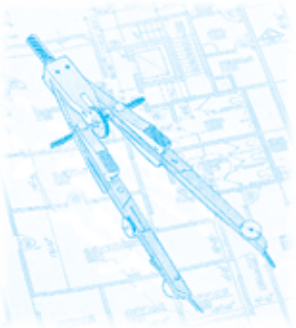
DESIGN TO FINISH®

SERVICES

GENERAL COMMERCIAL CONSTRUCTION



Our mission to our customers is the continuous improvement of our ability to meet their needs and exceed their expectations at every opportunity. We believe our knowledge, performance and dedication is creating a new standard in the construction industry.

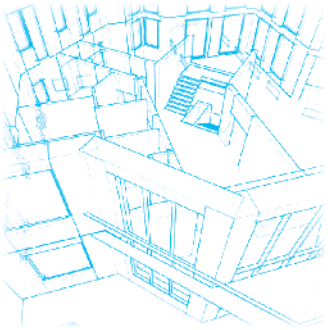
We provide complete interior renovation services to any area in the commercial and industrial field. We have led teams on millions-of-dollars of renovation projects.

Some areas of our expertise in this field include:

- General Practice Alterations
- Waiting Room Face Lifts
- ADA Upgrades
- Design/Build
- Pre-engineered Buildings
- Additions
- Senior Housing
- Fitness Centers
- Façade Renovations
- Car Dealerships
- Gyms

ABOUT US

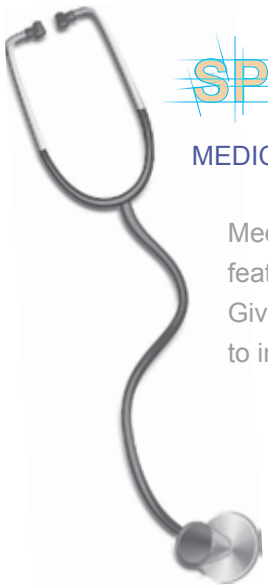
THE DIFFERENCE BETWEEN “ACCEPTABLE” AND “EXCEPTIONAL”



What is the most important aspect of commercial construction? Is it planning? Is it a more tangible element, such as craftsmanship, or the intangible but inestimable quality of leadership?

Design to Finish has established a record of superior performance, dedication to quality and customer satisfaction in all areas of construction, planning and delivery. On each project, we are continually providing every service necessary to not only obtain complete client satisfaction but also make our services an extraordinary value.

Throughout our career, Design to Finish has learned there is a huge gap that separates “acceptable” from “exceptional”. And we understand the difference is found in the minute-to-minute commitment of the people involved, and their ability to deliver excellence in *every* aspect of commercial construction.



SPECIALTY SERVICES

MEDICAL FACILITY CONSTRUCTION

Medical facilities, particularly hospitals, present their own unique set of features and qualities that set them apart from general construction projects. Given the uniqueness of medical facilities, there are many precautions we take to insure a successful project. These include:

- On-site review of existing layout
- Patient and staff safety while project is underway
- Work side-by-side with engineering staff
- Compliance with Infection Control Risk Assessment Matrix
- Open communication policy with key staff members
- Always on the leading edge of dust control techniques
- Compliance with Interim Life Safety Measures

Our areas of expertise in this field include:

- General Healthcare Renovations
- Exam/Treatment Rooms
- Long-Term Care Units
- Patient Rooms
- Rehabilitation Centers
- Corridors
- Shower Cores
- Nurse Stations
- Dining Halls
- Pharmacy
- X-ray Shielding

FOCUS ON HEALTHCARE

MEDICAL FACILITY CONSTRUCTION

Design to Finish was conceived from the get-go to develop and manage public and private commercial construction projects. Today, after renovating hundreds of thousands of square feet in hospitals and healthcare facilities across Connecticut, Massachusetts and Vermont, our expertise has flourished in the highly specialized field of medical facility construction.

This is an especially demanding arena, requiring high-level planning skills, expert knowledge, precision execution and attention to detail to meet the technical demands of the work. This includes meeting high standards of quality as well as compliance with relevant hospital, state and federal requirements. Our mastery of these skills keeps us doing business with happy and loyal customers.
